

KEREN OROZCO

SYSTEMS ENGINEERING | SOFTWARE | AI | AUTOMATION | DATA

Costa Rica | Kerenmiche363@gmail.com | English C1

PROFESSIONAL PROFILE

Systems Engineering student with hands-on experience across software development, AI-assisted engineering, data analytics, automation, and regulated medical device quality. Experienced building web applications, dashboards, workflow solutions, and AI-enabled tools while working in cross-functional technical environments. Strong foundation in C#, .NET, Python, TypeScript/React, SQL, Power BI, Git, APIs, and modern AI tools including Codex, Claude, Copilot, and Gemini. Combines systems thinking, technical problem-solving, data-driven decision making, and a strong focus on quality, documentation, and continuous improvement.

PROFESSIONAL EXPERIENCE

Boston Scientific - Design Quality Assurance Intern | 2025-Present | Costa Rica

- Support quality and engineering activities in regulated medical device manufacturing, including technical investigations, testing, controlled documentation, traceability, and change-related follow-up.
- Apply structured problem-solving methods such as Root Cause Analysis, 5 Whys, hypothesis analysis, Gemba observations, and data review to support evidence-based decisions.
- Develop Power BI dashboards, KPIs, and analytical summaries using Excel, Power BI, and Minitab to improve visibility of quality and process information.
- Collaborate with Quality, Engineering, Manufacturing, and R&D teams; use systems including Windchill, SAP, SharePoint, and Microsoft 365 to manage technical information and workflows.

SELECTED PROJECTS

KREA ONE - E-commerce & Entrepreneurship

React, TypeScript, responsive UI, product catalog, filters, cart, WhatsApp checkout, GitHub Pages, UX, branding, pricing, supplier coordination, and digital marketing.

FORGE - Gym Application

React, TypeScript, Vite, Supabase; application architecture, authentication, database integration, workout-related data, responsive UI, and scalable frontend structure.

AI Video Editor - AI & Automation

Python, FFmpeg, Whisper, Ollama/Qwen; automated transcription, silence detection, editing candidates, AI-assisted decisions, subtitles, synchronization, and vertical-video workflows.

NAIA - Client Website

Designed and developed a responsive website for an aesthetics business, translating client needs into a modern digital presence with clear service organization, usability, and visual consistency.

TECHNICAL SKILLS

Software: C# | .NET / .NET Core | Python | Java | TypeScript | JavaScript | React | Flask | REST APIs | OOP | LINQ | SOLID | Dependency Injection

Data & Databases: SQL | SQL Server | PostgreSQL | MySQL | Supabase | Power BI | Excel | Minitab | R | Data Visualization | KPI Development

AI & Automation: OpenAI Codex | Claude | Microsoft Copilot | Gemini | Ollama | Prompt Engineering | Agentic Workflows | Power Apps | Power Automate | Python Automation

Engineering & Quality: CAPA | NCEP | Root Cause Analysis | 5 Whys | Gemba | DFMEA | Risk Analysis | Testing | Technical Documentation | Lean | Six Sigma | Kaizen

Tools & Systems: Git | GitHub | Postman | Docker Fundamentals | CI/CD Concepts | GitHub Actions Fundamentals | Linux/WSL | SAP | SharePoint | Windchill | GNS3

EDUCATION

Bachelor's Degree in Systems Engineering - Universidad Latina de Costa Rica | Expected December 2026

Relevant areas: Software Engineering, Programming, Databases, Networking, Data Analysis, Cybersecurity, Operations Research, Project Management, Systems Analysis

TRAINING & PROFESSIONAL DEVELOPMENT

Minitab statistical analysis | Lean Manufacturing | Six Sigma | 6S | Kaizen | AI-assisted development | Prompt engineering | Continuous improvement
